

**Fortune Contract  
 Points Toward LEED Certification**

Indoor Air Quality Low Emitting Material: Carpets Credit 4.3	Fortune products are certified by the Carpet and Rug Institute's Green Label Plus Indoor Air Quality Testing Program for low VOC emissions, and contribute 1 LEED point for Low Emitting Material for Carpets.
Indoor Air Quality Low Emitting Materials: Adhesives & Sealants Credit 4.1	Fortune adhesives and seam sealers have low VOC content to contribute toward the total for low emitting adhesives and sealants, and are certified by CRI's Green Label Plus Indoor Air Quality Adhesive Testing Program.
Materials & Resources Recycled Content – Credit 4.1 & 4.2	<p>Fortune products manufactured with Natiq Envirowork 30 with 30% post-industrial recycled content contribute toward total materials and resources credit for recycled content.</p> <p>BioCel and EnviroCel backings are up to 90% green by weight to contribute toward materials and resources for recycled content. These products contain post-consumer, renewable resource and post-industrial recycled content. BioCel and EnviroCel are also available with attached cushion.</p> <p>Tile products are backed with EcoWorx backing with 40% post-industrial recycled content.</p> <p>These products contribute toward the total of materials used on the project with recycled content.</p>
Materials & Resources Local/Regional Materials Credit 5.1	<p>Fortune Contract products are manufactured in Dalton, Georgia. Products can contribute toward local regional materials. Major cities within a 500 mile radius are St. Louis, MO; Columbus, OH, Indianapolis, IN, Nashville, TN, Jacksonville, FL, Roanoke, VA and Raleigh, NC.</p> <p>Fortune products can contribute toward the total for local and regional materials used on the project.</p>
Materials & Resources Construction Waste Management Credit 2.1 & 2.2	<p>Carpets manufactured with Natiq Envirowork 30 Nylon 6 can be recycled through Nylene's 360 Recycling Program to contribute toward Construction Waste Management credit.</p> <p>Fortune products made with Natiq contribute toward the total for construction waste on the project.</p>
Materials & Resources Rapidly Renewable Materials Credit 6.0	<p>Fortune products specified in 100% rapidly renewable wool, and those with BioCel or EnviroCel backing with soy polymers contribute toward materials and resources credit for rapidly renewable materials.</p> <p>This product contributes toward the total for rapidly renewable materials used on the project.</p>
